DETAILED ACTION

Continued Examination Under 37 CFR 1.114

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 7/1/03 has been entered.

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 24-29, 38-42, 51, 52 and 54-56 are rejected under 35 U.S.C. 102(b) as being anticipated by Ohtani (US 6,108,099).

3. Ohtani (...099) discloses a method of scheduling a hard copy output engine comprising: providing a hard copy output engine (20) configured to use a consumable commodity comprising: a sensor (col. 4, lines 28-33); a processor (1); a memory (3); sensing status information of the consumable commodity (col. 4, lines 28-33); processing the status information, wherein the processing includes comparing the status information to information housed in the memory to determine if notification should occur to a notification recipient (col. 4,

Art Unit: 2852

lines 62-65); composing an electronic message to the notification recipient that includes the detected status information (abstract; col. 4, line 66 – col. 5, line 1; col. 5, line 53 – col. 6, line 7; and col. 7, lines 1-15); and transmitting the electronic message from the hard copy output engine to a scheduling engine (col. 6, lines 34-36; and col. 7, lines 44-47). A computer implemented hard copy output engine control system, the system comprising: a plurality of sensors coupled to the hard copy output engine, the sensors being configured to provide status information relating to a plurality of aspects of the hard copy output engine (col. 4, lines 28-33); and processing circuitry (1) coupled to the sensors, the processing circuitry configured to: read the sensors and detect the status of the aspects of the hard copy engine (col. 4, lines 62-65); and selectively look up from a memory contact information for a notification recipient intended to be notified of the status of the aspects of the hard copy engine, compose an electronic message including the detected status (abstract; col. 4, line 66 – col. 5, line 1; col. 5, line 53 – col. 6, line 7; and col. 7, line 1-15), and transmit the electronic message from the hard copy output engine to a scheduling engine (col. 6, lines 34-36; and col. 7, lines 44-47). The detecting status includes a toner out status (abstract; and col. 4, lines 28-29). The sensor and the processor are configured to sense and process information relating to paper inventory (col. 4, lines 62-65), out of paper (col. 4, lines 31-33) and out of consumables (col. 4, lines 28-33). Composing an electronic message includes composing the electronic message to include information including: date sent (col. 6, lines 10-11 and col. 7, line 19), addressee (col. 6, lines 12-13 and col. 7, lines 20-21), consumable order list (col. 6, lines 27-33; and col. 7, lines 37-43) and malfunction (col. 6, lines 60-63). The detecting status and aspects of the hard copy output engine includes: toner out (abstract; and col. 4, lines 28-33); out of paper (abstract; and col. 4, lines 28-33); and out of

Art Unit: 2852

consumables (abstract; and col. 4, lines 28-33). The hard copy output engine can be a facsimile machine, photocopier and printer (col. 1, lines 6-11). The scheduling engine comprises transmitting an electronic message including a consumable order (col. 6, lines 27-33; and col. 7, lines 37-43).

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 30, 43, 50 and 53 are rejected under 35 U.S.C. 103(a) as being unpatentable over Ohtani (US 6,108,099) and Tarr et al. (US 5,184,179).

6. Ohtani (...099) discloses the features mentioned previously, but does not disclose sensing a future need for preventive maintenance, replacement of a component part and maintenance.

Tarr et al. (...179) disclose a hard copy output apparatus and method including sensing a future need for preventive maintenance (col. 6, lines 20-23); replacement of a component part (col. 7, line 61 – col. 8, line 55); and information relating to maintenance (col. 6, line 20-23; and col. 7, line 61 – col. 8, line 55). It would have been obvious to one of ordinary skill in the art at the time of the invention to sense a future need for preventive maintenance, replacement of a

Art Unit: 2852

component part and maintenance, as disclosed by Tarr et al. (...179), so that maintenance can be properly and timely performed on the copy output engine.

Response to Arguments

7. Applicant's arguments with respect to claims 24-30, 38-43 and 50-56 have been considered but are moot in view of the new ground(s) of rejection.

8. Applicant's arguments filed 7/1/03 have been fully considered but they are not persuasive.

9. Applicant argues that Ohtani (US 6,108,099) does not teach or suggest a hard copy device that senses, processes and transmits electronic messages; however, this is incorrect, as explained in the rejection above. Moreover, applicant argues that none of the cited references teach the limitations a claimed in claims 24, 38 and 51; however, this is incorrect, as explained above, Ohtani (...099) discloses the limitations of claims 24, 38 and 51.

Final Rejection

10. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period

Art Unit: 2852

will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
